

Welcome to the world of the black sheep.

How it is to be different?

Let us guide you through another world.

A world where problems are **opportunities, solutions and challenges**. We do not promise the moon or tell fairy tales, but straightforward no-nonsense solutions against competitive pricing. We achieve this by thinking **out-of-the-box**.

With our own herd of productions, a very experienced team of designers as creative trimmers and a management functioning as a shepherd we try to keep everything as low profile as possible. Short lines, straightforward communication and keeping everything in the safety of the sheepfold.

Our customers will automatically benefit of being part of our herd, where they experience protection and a warm environment.
